

Exeter Community Centre

This £1.4m development undertaken on a design build basis comprised the refurbishment and conversion of this Grade II Listed building in the centre of Exeter into a much needed community base for local organisations and community groups.

The refurbishment facility, covering an area of 1700 square metres over 3 floors, provides a multi-purpose hall, café, GP surgery, office space for community groups and social enterprises together with a nursery and playgroup facility.

Externally significant works were necessary to clean and restore the brick and stonework, and to make the building watertight with repairs to the roof and windows.

a building reputation...
