

YMCA Street

A development in the heart of Street to construct a mix of 21 apartments to provide affordable accommodation for young people. The scheme also involves a shop, offices and a training room to support the residents and young people from across the Mendip region.

The scheme is extremely challenging due to the physical constraints of the site which features several party wall agreements, restricted access which has influenced the phasing of the works, and the close proximity of surrounding properties.

The project was undertaken on a design build basis.

Value: £1.5m

Client: Mendip YMCA
