

**Bakery Extension, Lidl Store, Torrington**

Completed in June 2016, this single storey extension at the Torrington store provided an enlargement of the Bakery and also provided additional storage space for refrigeration housing.

The extension is of traditional foundations with a ground bearing slab, steel frame in-filled with cavity blockwork and rendering. The roof has an insulated single ply, kingspan panel with new parapet aluco coping and cladding panels. New mechanical and electrical works were provided for the new oven area and freezer room.

**Client:** Lidl UK GmbH  
**Value:** £0.35m
