

Filton Retail Units, Bristol

Built alongside the busy A38 road into Bristol, this project comprised the construction of 5 retail units to shell, with parking to the front opening out onto the main road.

Formerly a petrol filling station, the development was built on a sloping site which required piling. The units feature a steel frame with elevations clad in a mixture of brick, render and reconstituted stone.

The largest of the 5 units has been occupied by Morrisons to form a “local” retail store.
Client: Malthurst Petroleum Ltd
