

### **Extension to Manufacturing Facility Neal's Yard, Gillingham**

Completed in August 2016, the works comprised a number of extensions to the existing manufacturing and warehouse facility at Neal's Yard Remedies' headquarters in the rural location of Gillingham. Together with an internal fit out and alterations, the new block was constructed to form offices, reception and a retail outlet.

Built on traditional foundations and a structural steel frame for the superstructure, the new areas mirror the existing buildings as part of the eco-friendly designed facility. Additionally, the provision of a "living-wall" is aesthetically pleasing to its rural setting and in keeping with the Company's conservation of natural resources.

**Client:** Neal's Yard Remedies
