

## St Werburgh's Community Centre, Bristol

Construction of Major Extension and Complete Refurbishment to Existing Centre

This busy community centre is located just to the side of the M32 in Bristol and occupied a former school premises.

The Victorian buildings had become somewhat dilapidated and the granting of Lottery funding allowed the Centre Managers to commission a major refurbishment and extend the centre into a major new building.

Pollard was entrusted with the work and agreed a phased programme that left the Centre with space in which to operate whilst we upgraded the accommodation.

Planned to run alongside the refurbishment the new build was founded on piles and featured a striking design with a number of environmental features. The building boasts a sedum roof and extensive sun pipes.

Close attention to detail by our site team ensured a satisfactory outcome in terms of quality and customer care.

We were pleased to celebrate the opening of the Centre (see lower photograph) with the many people it serves.
