

Medical Centre Creech St Michael Taunton

Undertaken on a design build basis, with the design team novated, this project comprised the construction of a two storey health centre with a pharmacy, together with associated external works including car parking and new access road.

Part traditional and part steel frame, the facility provides on the ground floor consulting rooms, nurse practitioners rooms, physio and treatment rooms. On the first floor are common areas of staff rooms, practice manager's office, conference and training room together with administration and facilities for Trust staff.

External elevations feature a mix of render and hard wood timber.
