

Refurbishment and Extension
Frethey House Nursing Home,
Bishops Hull, Taunton

A project that comprised the construction of a major two-storey extension designed in keeping with the existing buildings. The completed development created a large communal lounge and numerous en-suite bedrooms with associated external landscaping.

In addition the existing building was refurbished to accommodate the administrative facility and kitchens for this large nursing home. This involved the removal and reconstruction of ground and first floor structures with the rebuilding of the whole internal fabric, within the walls and roof of the existing building.

The project was undertaken whilst the existing nursing home remained in occupation.
